SUBJECT INDEX TO VOLUME 5

Absorption of infrared radiation inside an explosively boiling fine coal-water particle, 193
Acoustic flow instruments for solid/gas flows, 219

Bubble characteristics in three phase fluidized beds of floating bubble breaker, 309

Collection mechanisms of electret filters, 161
Continuous cooling of wet foundry sand using a fluidized bed, 207

Delivery of substances into cells and tissues using a particle bombardment process, 27
Determination of the fractal dimensions of coal filter cakes and their relationship to cake permeability, 371
Dynamics of agglomerate size distribution in linear shear flow fields, 383

Effective dielectric constant of dust layers, 105
Experimental study of nonwoven filter performance using second order orthogonal design, 271

Flow patterns through tube bundles and particulate fouling onto cylinders, 397

Hold-up volume and mean residence time measurements in the air-sparged hidrocyclone, 409

Improvements in the classification efficiency of a hydrocyclone with an impeller installation around the vortex-finder, 83
Interaction between pressure drop of gas and flow of medium in a moving granular bed filter, 131

Manufacture of optical waveguides using aerosols: a review, 13
Measurement and control of electrostatic charges on pulverized coal in a pneumatic pipeline, 115
Modeling of solid flows in a fluidized bed with secondary tangential air injection in the freeboar, 323

Numerical modeling of multiphase particulate flow and its application to sedimentation, 357

Oilwell completion fluid solids interaction with an uncosolidated oil reservoir, 173

Particles and drug delivery systems, 53
Particle morphologies: infinite fibers and threads, 261
Particles and photography, 1
Particles and power generation by fusion reactions, 143
Particle surface morphologies 2. Fibers—Part1: Mathematical description, 151
Particle surface morphologies: flakes, 301
Particle velocity measurements through electrostatic field fluctuations using external probes, 95

Role of particles and dispersions in electrophotography, 39

Stability of concentrated colloidal dispersions in apolar media, 289
Stability of latex particles in aqueous suspensions, 65
Stokes flows through a system of parallel infinite cylinders with axes oriented at an angle to the direction of mean flow, 339
Suspension of solid particles in agitated vessels, 235

Total ultrafine particle monitoring and detection, 421
